1b. Lowest Priced Model Number:

Not Applicable

1c. Corresponding Commercial Job Titles, Experience, Functional Responsibility and Education

See page 8 of this price list for full descriptions.

2. Maximum Order:

\$1,000,000

3. Minimum Order:

\$100

4. Geographic Coverage (delivery area):

Worldwide

5. Point(s) of Production (city, country, and state or foreign country):

Same as company address

6. Discount from list prices or statement of net price:

Government Net Prices (discounts already deducted). See prices attached.

7. Quantity discounts:

None

8. Prompt payment terms:

Net 30 days

9a. Notification that Government purchase cards are accepted up to the micro-purchase threshold

Yes

9b. Notification that Government purchase cards are accepted or not accepted above the micro-purchase threshold

Accepted

10. Foreign items (list items by country of origin):

None

11a. Time of Delivery (Contractor insert number of days):

Specified on the Task Order

11b. Expedited Delivery.

Contact Contractor

11c. Overnight and 2-day delivery:

Contact Contractor

11d. Urgent Requirements

When the Federal Supply Schedule contract delivery period does not meet the bona fide urgent delivery requirements of an ordering agency, agencies are encouraged, if time permits, to contact the contractor for the purpose of obtaining accelerated delivery. The contractor shall reply to the inquiry within 3 workdays after receipt. (Telephonic replies shall be confirmed by the contractor in writing.) If the contractor offers an accelerated delivery time acceptable to the ordering agency, any order(s) placed pursuant to the agreed upon accelerated delivery time frame shall be delivered within this shorter delivery time and in accordance with all other terms and conditions of the contract. Contact contractor.

24a. Special Attributes such as environmental attributes, (e.g., recycled content, energy efficiency, and/or reduced pollutants):

Not Applicable

24b. Section 508

If applicable, Section 508 compliance information is available on Electronic and Information Technology supplies and services at:

<http://www.caci.com/Contracts/508.shtml>.

The EIT standards can be found at: www.Section508.gov/.

25. Data Universal Numbering System (DUNS) Number

11-489-6066

26. Notification regarding registration in System for Award Management (SAM) database.

CACI, INC. – FEDERAL is registered in the SAM Database.

Registration valid until 01/30/2015.

27. Uncompensated Overtime

CACI has an established cost accounting system, approved by DCAA, which records all hours worked, including uncompensated hours for all employees regardless of the contract type. All uncompensated overtime hours are included in CACI's base for allocation of overhead costs. No uncompensated effort will be performed without supervision. Uncompensated effort is supported by clerical and secretarial personnel only when necessary; i.e., if the uncompensated effort would otherwise be unproductive. Employees are required or encouraged to perform uncompensated effort only when necessary to refine work products, meet deliverable deadlines, or otherwise respond to customer requirements.

LOGISTICS WORLDWIDE (LOGWORLD) SERVICES DESCRIPTIONS

SIN 874-501/874-501RC Supply and Value Chain Management Services

CACI Inc. – FEDERAL (CACI), has been providing Supply and Value Chain Management (SCM) services from its inception over 43 years ago. Today we have over 1200 employees around the world providing comprehensive logistics support. Our ability to coordinate and optimize the efforts across multiple logistics disciplines and life cycle phases insures that our customers' supply chains yield the highest possible value per dollar spent on logistics.

The following is representative, but not all-inclusive, of the types of services or products that may be ordered as specified in individual task orders: Services that include all phases of planning, acquisition and management of logistics systems. These services include, but are not limited to planning, acquisition, design, development, testing, production, fielding, management, operation, maintenance, sustainment, improvement, modification and disposal.

Examples of the type of services that may be performed under this SIN include: Logistics consulting for planning for the acquisition and life cycle phases of supply and value chain systems including the following: defining and establishing program objectives, strategies, plans and schedules; develop milestone documentation; market research and acquisition planning; material requirements identification, planning, acquisition and management; develop specifications or performance based work statements and task estimates; develop, document and support maintenance procedures and technical manuals; configuration data management and related documentation; expansion and consolidation studies, field problem analysis and recommendation of corrective actions and system modernization; Needs assessment/system assessment; Inventory/asset/vendor management; Inventory management and operation (inclusive of salvage, recycle and/or disposal management); operation of warehouses, stockrooms, storage facilities or depots; Fulfillment systems and operations; platform management; Information logistics processing systems analysis design, and implementation; staging, shipping, receiving, packing, crating, moving and storage (excluding household goods); packaging, labeling, bar coding system consultation, design, implementation, operation and maintenance; design and installation of material handling systems; hazardous material storage and handling (**Non-radioactive only**); warehouse and location management systems; recycling program management of warehousing materials; preservation and protection of specialized inventory or documents; maintenance, repair and overhaul (MRO) support and/or support process management; aircraft repair and maintenance; ship repair and maintenance; property disposal management; logistics strategic planning services; logistics systems engineering services; logistics program management services and support; Unique Identification (UID)/Radio Frequency Identification (RFID) services; Program and project management; acquisition and life cycle management; spares modeling; supply chain integration planning; global integrated supply chain solutions – planning and implementation. (Note – acquisition functions can not be procured as stand-alone services).

SIN 874-503/874-503RC Distribution and Transportation Logistics Services

CACI provides services to design and support integrated distribution and transportation logistics networks and systems. CACI's services integrate unit or field level, installation or base level and

GS-10-0259L

5/1/06 – 4/30/16

depot or headquarters level supply systems that manage inbound and outbound movement, documentation and requisition information. The resulting systems are capable of supporting routine and surge requirements, and will produce both documentation for basic transaction processing but timely information for managing the tactical and strategic operation as well. CACI can design source movement information systems that will provide data for in-transit visibility (ITV), and control over both passenger and cargo movement.

The following is representative, but not all-inclusive, of the types of services or products that may be ordered as specified in individual task orders: Services that include distribution and transportation logistics services such as planning and designing, implementing or operating systems or facilities for the movement of supplies, equipment or people by road, air, water or rail. Examples of the type of services that may be performed under this SIN include but are not limited to: movement and short-term storage (excluding household goods); transportation system development and management; distribution and transportation logistics consulting; carrier management and routing; freight forwarding, consolidation and management; third-party logistics (3PL); facilitating customs processing; Electronic Freight Manifest (EFM) systems; tracking system analysis, design, operations and management; shuttle services; program and project management.

Note: Commercial passenger airline services covered by the Airline City Pair Program and courier services covered by Schedule 48, Transportation, Delivery and Relocation Solutions are excluded.

SIN 874-504/874-504RC Deployment Logistics Services

CACI has been providing Deployment Logistics Services for a wide variety of customers. Services include contingency planning; inventory management, property accounting, movement, storage, asset management, communications and information systems technology. Our services and logistics systems support the rapid deployment and management of supplies and equipment worldwide. CACI provides expert advice, assistance, guidance, or operational support to identify and utilize existing regional or global resources, identify alternative capabilities, and plan for effective integration of public and private sector support or resources to support existing or planned deployments.

Services that include, but are not limited to providing expert advice, assistance, guidance, management, or operational support services that permit the deployment of supplies, equipment, materials and associated personnel. Examples of the type of services that may be performed under this SIN include deployment logistics consulting; war gaming (field exercises); contingency planning; inventory and property requirements planning, movement, storage and accountability systems; asset management (including pre-positioning assets); space planning and project integration/implementation; public and private sector support and/or resources; facilitating customs processing/accountability; scenario based field exercises; communication and logistics systems design, plan, deployment and operation; medical and emergency unit storage and restocking management; program and project management.

SIN 874-505/874-505RC Logistics Training Services

CACI's experience in providing training services extends over 43 years since our inception in 1962. Training in systems operations, warehousing, material planning and handling, transportation management, inventory management, and the tools utilized in supply and value chain management are some examples of the types of services provided under this SIN.

LABOR CATEGORY DESCRIPTIONS

NOTE: Some labor categories provide for different levels of education and experience within the same skill set. These are designated as Level I, II, III, Lead, etc. For example, a Management Consultant II has 3 more years experience than a Management Consultant I

Professional Services

Management Consultant

The candidate will have experience managing at least one large program or concurrent management of multiple complex projects, from inception to deployment. Specialized Experience includes demonstrated experience managing a program or project team responsible for projects in one or more of the following areas: Supply and Value Chain Management; Acquisition Logistics, Distribution and Transportation Logistics Services, Deployment Logistics, Logistics Training Services, and Material and Engineering Management. Must be able to demonstrate experience managing the use of applicable methodologies and tools. General experience includes demonstrated exceptional written and oral communications skills, including project plans, white papers, proposals and formal presentations. Must have demonstrated experience in managing all key project areas. Proven expertise in the management and control of funds and resources.

Educational Requirement: Bachelor's degree

Minimum Experience Requirement with Bachelor's Degree:

Level	Years of Experience	
	General	Specific
I	8	5
II	11	8

Education/Experience Alternates:

Level	No Degree		Associate's		Master's		Ph.D.	
	Gen	Spec	Gen	Spec	Gen	Spec	Gen	Spec
I	12	9	10	7	6	3	4	1
II	15	12	13	10	9	6	7	4

Expert / Consultant

The candidate will have both technical and/or management experience, from inception to deployment, of two or more large-scale complex projects. Specialized Experience includes demonstrated experience managing a program or project team responsible for projects similar to the functional or technical areas defined by the RFP or in one or more of the following areas: Supply and Value Chain Management; Acquisition Logistics, Distribution and Transportation Logistics Services, Deployment Logistics, Logistics Training Services, and Material and Engineering Management. Must be able to demonstrate experience managing the use of applicable methodologies and tools. General experience includes demonstrated exceptional written and oral communications skills, including project plans, white papers,

proposals and formal presentations. Demonstrated expertise and ability in solving complex problems in an efficient and unique manner.

Educational Requirement: Bachelor's degree

Minimum Experience Requirement with Bachelor's Degree:

Level	Years of Experience	
	General	Specific
I	6	3
II	10	7

Education/Experience Alternates:

	Gen	Spec	Gen	Spec	Gen	Spec	Gen	Spec
I	9	6	7	4	4	2	3	1
II	14	10	12	9	8	5	6	3

Program Manager

The candidate will have experience managing at least one large program or concurrent management of multiple complex projects, from inception to deployment. Specialized Experience includes complete project development from inception to deployment, in work similar to what is described in the RFP. Demonstrated ability to provide guidance and direction in multiple tasks across several functional areas and including the use of different technologies. Proven expertise in the management and control of funds and resources, demonstrated capability in managing complex multi-task contracts. General experience includes demonstrated exceptional written and oral communications skills, including project plans, white papers, proposals and formal presentations. Must have demonstrated experience in managing all key project areas. Proven expertise in the management and control of funds and resources.

Mid-Level Acquisition and Program Strategy Analyst II

Specialized experience: Candidate's specialized experience will include strong demonstrated hands-on experience and a diverse range of subject matter expertise in one or more relevant areas of the acquisition life cycle or program/project functional area, to include: purchasing/procurement, source selection, training, research, business process improvement, policy development, financial analysis, automated systems development/analysis/ implementation, federal government project or program management, federal statutes and regulations, acquisition or contracting management. Ability to successfully manage routine to moderately complex matters and provide assistance on broad agency efforts in the relevant subject matter area. Ability to participate as a member of a team or work independently, coordinate with others, and provide leadership on a diverse range of individual task elements.

General experience: Experience in any professional or functional area that required analysis of written materials, attention to detail, interaction and coordination with other personnel on policy or process matters, application of procedures, implementation of processes and instructions, research, documentation and/or formation of recommendations

Responsibilities: This individual will perform operational or consulting support in one or more areas of the acquisition life cycle or program/project functional area, to include: purchasing/procurement, source selection, training, research, business process improvement, policy development, financial analysis, automated systems development/analysis/ implementation, federal government project or program management, federal statutes and regulations, acquisition or contracting management. Will perform most work independently in a mid-level, non-managerial role, exercising much latitude over steps to carry out taskings, prioritize workload and make recommendations on overall strategies.

Educational Requirement: High School Diploma plus completed course work in one or more college-level or professional training courses in procurement, program management, business or Government acquisition.

Minimum Experience Requirement with High School Diploma:

Level	Years of Experience	
	General	Specific
II	9	5

Education/Experience Alternates:

II	7	4	5	2	4	1	1	1

Sr. Acquisition and Program Strategy Analyst I

Specialized experience: Specialized experience will include strong and increasingly responsible demonstrated hands-on experience and a diverse range of subject matter expertise in one or more relevant areas of the acquisition life cycle or program/project functional area, to include: purchasing/procurement, source selection, training, research, business process improvement, policy development, financial analysis, automated systems development/analysis/ implementation, federal government project or program management, federal statutes and regulations, acquisition or contracting management. Demonstrated record of professional excellence among multiple organizations. Ability to successfully manage, simultaneously, multiple routine to highly complex matters and provide assistance and well-developed analyses on broad agency efforts in the relevant subject matter area(s). Ability to participate as a member of a team, frequently in a lead role, or work independently, coordinate with others, and provide leadership on a large and diverse range of complex individual task elements.

General experience: Experience in any professional or functional area that required analysis of written materials, attention to detail, interaction and coordination with other personnel on policy or process matters, application of procedures, implementation of processes and instructions, research, documentation and/or formation of recommendations

Responsibilities: Will perform operational or consulting support in one or more areas of the acquisition life cycle or program/project functional area, to include: purchasing/procurement, source selection, training, research, business process improvement, policy development, financial analysis, automated systems development/analysis/ implementation, federal government project or program management, federal statutes and regulations, acquisition or contracting management. Will perform most work independently in a mid-level, non-managerial role, with occasional oversight to less experienced personnel. Will provide formal briefings and/or training to others. Will be responsible for exercising much latitude over steps to carry out taskings, developing original solutions, prioritizing workload and making recommendations on overall strategies. Will often be considered the "go to" person in functional area and may be responsible for interacting with customer's management on key matters.

Educational Requirement: High school Diploma plus completed course work in one or more college-level or professional training courses in procurement, program management, business or Government acquisition.

Minimum Experience Requirement with High School Diploma:

Level	Years of Experience	
	General	Specific
I	9	7

	Gen	Spec	Gen	Spec	Gen	Spec	Gen	Spec
I	8	5	6	4	5	3	2	2

Sr. Acquisition and Program Strategy Analyst III

Specialized experience: Specialized experience will include outstanding recent operational and managerial, team lead or supervisory experience, and a diverse range of subject matter expertise in one or more relevant areas of the acquisition life cycle or program/project functional area, to include: purchasing/procurement, source selection, training, research, business process improvement, policy development, financial analysis, automated systems development/analysis/ implementation, federal government project or program management, federal statutes and regulations, acquisition or contracting management. Demonstrated record of professional excellence among multiple organizations in challenging roles, including management/team lead roles. Ability to successfully manage, simultaneously, multiple and mostly highly complex matters and provide assistance and well-developed analyses on broad agency efforts in the relevant subject matter area. Ability to participate as a member of a team, in a lead role, or work independently, coordinate with others, and provide leadership on a large and diverse range of complex individual tasks or groups of tasks.

General experience: experience in any professional or functional area that required analysis of written materials, attention to detail, interaction and coordination with other personnel on policy or process matters, application of procedures, implementation of processes and instructions, research, documentation and/or formation of recommendations

Responsibilities: This individual will perform operational or consulting support in one or more areas of the acquisition life cycle or program/project functional area, to include: purchasing/procurement, source selection, training, research, business process improvement, policy development, financial analysis, automated systems development/analysis/ implementation, federal government project or program management, federal statutes and regulations, acquisition or contracting management. Will perform almost all work independently in a senior level role that will likely include management, oversight and training responsibilities. Will provide formal briefings and/or training to others. Will be responsible for exercising much latitude over the approach and implementation of taskings, developing original solutions, prioritizing workload and making recommendations on overall strategies, including the coordination of others' work. Will be considered the "go to" person in functional area and will be responsible for routinely interacting with customer's management on key matters.

Educational Requirement: Bachelor's Degree plus completed course work in one or more college-level or professional training courses in procurement, program management, business or Government acquisition

Principal Acquisition and Program Strategy Consultant III

Specialized experience: Specialized experience will include outstanding recent managerial experience in the relevant subject area, and a diverse range of related subject matter expertise in one or more relevant

GS-10-0259L

areas of the acquisition life cycle or program/project functional area, to include: purchasing/procurement, source selection, training, research, business process improvement, policy development, financial analysis, automated systems development/analysis/ implementation, federal government project or program management, federal statutes and regulations, acquisition or contracting management. Demonstrated record of professional excellence among multiple organizations in challenging management roles directing the work of personnel in multiple functional areas. Will likely include successful experience as a second level supervisor, including making personnel and resource allocation decisions. Experience providing advice and expertise directly to key, top level managers and decision makers. Experience managing multiple contracts for Government customers including responsibility for planning, coordinating and making decisions on costs, technical approach, schedules, performance metrics, quality control and personnel management.

General experience: Experience in any professional or functional area that required analysis of written materials, attention to detail, interaction and coordination with other personnel on policy or process matters, application of procedures, implementation of processes and instructions, research, documentation and/or formation of recommendations

Responsibilities: Will perform management/oversight of operational or consulting support tasks in one or more areas of the acquisition life cycle or program/project functional area, to include: purchasing/procurement, source selection, training, research, business process improvement, policy development, financial analysis, automated systems development/analysis/ implementation, federal government project or program management, federal statutes and regulations, acquisition or contracting management. This individual will be responsible for planning, scheduling and conducting, through their own taskings and those of others they coordinate with, all phases of the project(s) they are responsible for. May perform in a project or program manager role or oversee an on-site project manager. Will apply in-depth understanding of agencies' mission, organizational interrelationships and priorities and take into account the resource implications of decisions. Will serve in a decision-making role with respect to the work of other contractor personnel on the project and may serve as the customer's focal point.

Educational Requirement: Bachelor's Degree plus completed course work in one or more college-level or professional training courses in procurement, program management, business or Government acquisition.

Computer Operator

Monitors and operates the control console of either a mainframe digital computer or a group of minicomputers, in accordance with operating instructions, to process data. Work is characterized by the following duties:

- Studies operating instructions to determine equipment setup needed.
- Loads equipment with required items (tapes, cards, paper, etc.)
- Switches necessary auxiliary equipment into system
- Starts and operates control console
- Diagnoses and corrects equipment malfunctions
- Reviews error messages and makes corrections during operation or refers problems
- Maintains operating record

May test run new or modified programs and assist in modifying systems or programs. Included within the scope of this definition are fully qualified Computer Operators, trainees working to become fully qualified operators, and lead operators providing technical assistance to lower levels.

General Clerk

Performs a combination of clerical tasks to support office, business, or administrative operations, such as: maintaining records; receiving, preparing, or verifying documents; searching for and compiling information and data; responding to routine requests with standard answers (by phone, in person, or by correspondence). The work requires a basic knowledge of proper office procedures. Workers at level I, II and III follow prescribed procedures or steps to process paperwork; they May perform other routine office support work, (e.g., typing, filing, or operating a keyboard controlled data entry device to transcribe data into a form suitable for data processing). Workers at level IV are also required to make decisions about the adequacy and content of transactions handled in addition to following proper procedures. Clerical work is controlled (e.g., through spot checks, complete reviews, or subsequent processing) for both quality and quantity. Supervisors (or other employees) are available to assist and advise clerks on difficult problems and to approve their suggestions for significant deviations from existing instructions.

Production Control Clerk

Compiles and records production data for industrial establishments to compare records and reports on volume of production, consumption of material, quality control, and other aspects of production, performing any combination of the following duties: Compiles and records production data for such documents as customer orders, work tickets, product specifications and individual worker production sheets, following prescribed recording procedures and using typewriter and other devices. Calculates such factors as types and quantities of items produced, materials used, amount of scrap, frequency of defects, and worker and department production rates, using adding machine or calculator. Writes production reports based on data compiled, tabulated and computed, following prescribed formats. Maintains files of documents used and prepared. Compiles from customer orders and other specifications detailed production sheets or work tickets for use by production workers as guides in assembly or manufacture of products.

Prepares written work schedules based on established guidelines and priorities. Compiles material inventory records and prepares requisitions for procurement of materials and supplies. Charts production using chart, graph, or pegboard, based on statistics compiled for reference by production and management personnel. Sorts and distributes work tickets or material to workers. May compute wages from employee time cards and post wage data on records used for preparation of payroll.

Secretary

Provides principal secretarial support in an office usually to one individual, and, in some cases, also to the subordinate staff of that individual. Maintains a close highly responsive relationship to the day-to-day activities of the supervisor and staff. Works fairly independently, receiving a minimum of detailed supervision and guidance. Performs varied clerical and secretarial duties requiring a knowledge of office routing and an understanding of the organization, programs, procedures related to the work of the office.

Shipping Packer

Prepares finished products for shipment or storage by placing them in shipping containers, the specific operations performed being dependent upon the type, size, and number of units to be packed, the type of container employed, and method of shipment. Work requires the placing of items in shipping containers and may involve one or more of the following: knowledge of various items of stock in order to verify content; selection of appropriate type and size of container; inserting enclosures in container; using excelsior or other material to prevent breakage or damage; closing and sealing container; and applying labels or entering identifying data on container. Excludes packers who also make wooden boxes or crates.

Shipping/Receiving Clerk

Performs clerical and physical tasks in connection with shipping goods of the establishment in which employed and receiving incoming shipments. In performing day-to-day, routine tasks, follows established guidelines. In handling unusual non-routine problems, receives specific guidance from supervisor or other officials. May direct and coordinate the activities of other workers engaged in handling goods to be shipped or being received. Shipping duties typically involve the following: Verifying that orders are accurately filled by comparing items and quantities of goods gathered for shipment against documents; insuring that shipments are properly packaged, identified with shipping information], and loaded into transporting vehicles; and preparing and keeping records of goods shipped, e.g., manifests, bills of lading.

Receiving duties typically involve the following: Verifying the correctness of incoming shipments by comparing items and quantities unloaded against bills of lading, invoices, manifests, storage receipts, or other records; checking for damaged goods; insuring that goods are appropriately identified for routing to departments within the establishment; preparing and keeping records of goods received.

Supply Technician

Performs limited aspects of technical supply management work (e.g., inventory management, storage management, cataloging, property utilization) related to depot, local, or other supply activities. Work usually is segregated by common area or function, and controlled in terms of difficulty, complexity, or responsibility. Assignments usually relate to stable or standardized segments of technical supply management operations; or to functions or subjects that are narrow in scope or limited in difficulty. The work generally involves individual case problems or supply actions. The work may require consideration of program requirements, together with specific variations or from standardized guidelines.

Assignments require: A good working knowledge of the governing supply systems, programs, policies, nomenclature. Work methods, manuals, or other established guidelines; an understanding of the needs of

GS-10-0259L

5/1/06 – 4/30/16

the organization serviced; Analytical ability to define or recognize the dimension of the problem involved, to collect the necessary data, to establish the facts, and to take or recommend action based upon application or interpretation of established guidelines.

The Service Contract Act (SCA) is applicable to this contract and includes SCA applicable labor categories. The prices for the indicated SCA labor categories are based on the U.S. Department of Labor Wage Determination Number(s) identified in the matrix. The prices offered are based on the preponderance of where work is performed and should work be performed in an area with lower SCA rates, resulting in lower wages being paid, the task order prices will be discounted accordingly.
